

Statement on Fiber Optic Infrastructure Coverage in Adamawa State

This document serves to formally state the current status of fiber optic infrastructure deployment in Adamawa State in line with the requirements of **Disbursement Linked Indicator (DLI) 1**.

As at the date of this report, **Adamawa State has achieved an estimated total of One Thousand Five Hundred Kilometres (1,500 km) of fiber optic cable coverage** across the state.

This coverage reflects ongoing and completed investments in digital connectivity infrastructure aimed at improving broadband access, supporting e-government services, enabling private sector participation, and strengthening the overall digital economy within the state.

The deployed fiber network spans strategic urban centres, key government institutions, and priority economic corridors, forming a foundational layer for current and future digital transformation initiatives of the Adamawa State Government.

This statement is issued for official documentation, monitoring, and verification purposes under **DLI 1**.
